SPECIFYING LAMINEX TIMBER VENEERS

Panels shall be specified by Laminex, with the following details:

SPECIES

Name or colour of veneer

SUBSTRATE

MDF, FR MDF, Particleboard or Plywood

THICKNESS

MDF: 3mm, 4mm, 5mm, 12mm, 16mm, 19mm, 25mm and 32mm

Particleboard: 9mm, 12mm, 16mm, 18mm, 25mm

Plywood: 1.5mm to 32mm

BACKING

G2S or BAMO

Laminex® Finished Designed Timber Veneer panels and Finished Natural Timber Veneer panels have the benefits of raw veneers, but are pre-finished and textured. This means you don't need to worry about polishing at the fabrication stage. You can save time and money and feel confident about how the final product will appear.

PRODUCT OPTIONS

Laminex Timber Veneers are available in a variety of options.

Designed Timber Veneers

Three exclusive Wave veneers made from Australian timbers - Tasmanian Oak, Blackbutt and Spotted Gum.

Finished Designed Timber Veneers

A range of prefinished Designer Veneers in a selection of subtle interior tones, sourced from Europe.

Finished Natural Timber Veneer

Natural Timber Veneers - American Oak, Smoked Oak and American Walnut - are available in a stunning prefinished matt finish.

ADVANTAGES

- Available in fashion colours and hues that blend beautifully with the Laminex Colour Palette and essastone® range
- Easily coordinated with interior fittings
- Ready for use, reducing labour, handling and finishing costs
- Covered with a protective, peel-off film for transportation and handling
- Stain resistant and more impact resistant than traditional veneers
- Sourced from sustainable plantation timbers
- Textured and pre-finished

APPLICATIONS*

- Commercial and residential interiors
- Furniture and joinery
- Retail and restaurant fitouts
- Reception areas and hotels
- Any interior project that demands a consistent pattern and colour

* Laminex Designed Timber Veneer and Finished Natural Timber Veneer panels are for interior applications only.

COLOUR CONSISTENCY

While there can be minor variations, Finished Designed Timber Veneer panels from the same block or log of veneer will exhibit a consistent colour, pattern and look. This makes it easy to match other interior applications and spaces.

The Australian Natural Wave and Finished Natural ranges are produced from natural veneers. No dyes are used and natural colour and grain variations can be expected and are not considered a defect.

Important note: White or black veins are a feature of the natural timber and may be visible during the manufacturing process, as well as in the final board. These veins are sometimes more apparent in darker colours. They are a natural component of the timber species used in the production of Laminex Timber Veneers, and as such, are not considered a defect.

FINISHING

Laminex Finished Designed Timber Veneer panels and Finished Natural Timber Veneers do not require polishing.

Laminex Designed Timber Veneers require polishing. Consult your manufacturer for your polishing requirements.

SIZE, THICKNESS AND EDGING

Laminex Timber Veneer panels are available in 2400mm lengths and some can be made to order in 2700mm and 3000mm lengths as well. Note that the Australian Wave and Natural Finished decors can only be made in panels 2400mm long. Veneers are usually pressed onto single sided white MR MDF. Matching unglued edging is available. For more information about our product options, please contact the Laminex Australia branch nearest you.

Laminex Timber Veneer panels are marketed and distributed by Laminex Group Pty Limited ABN 98 004 093 092, trading as Laminex. In some cases, Laminex uses computer generated imagery (CGI) to provide graphical representations of our products where actual photos are not available. The colours and finishes of the products featured within all Laminex imagery are as close to the Laminex range as CGI, photographic lighting and our printing processes allow. Different camera angles, although not designed to be misleading, can sometimes distort actual size and distances. Laminex Timber Veneer panels are no different to most other materials in that darker colours will show scratches and superficial wear and tear more readily than lighter colours. Veneer products, including Laminex Timber Veneer panels, being comprised of natural timbers will react to direct and indirect light. Therefore, a change of the surface colour and appearance over time is a natural characteristic, not a defect. Additionally, heat and humidity will interact with light to accelerate the ageing process. Please obtain a copy of the terms and conditions of the Laminex Timber Veneer panels 7 year limited warranty from laminex.com.au for more information. This warranty is in addition to any rights that may exist under the Australian Consumer Law. Laminex® essastone®
